MATAMBO SUBSTATION IN TETE:
COMMISSIONED RECENTLY BY
TECNEL

AUTOMATIC FIRE DETECTION AND EXTINGUISHMENT IN TRANSFORMERS MATAMBO SUBSTATION

After demerging from ABB group, TECNEL has been acting as an integrator in the power systems capital projects, as well as, in the industry and very close to large EPC Contractors, erecting substations and power plants. Tecnel is also KSB representative in the Country, this means that we may supply any pump according to several standards, NFPA, ATEX proof for a variety of applications water, O&G, oil storage, sprinklers fire safety systems, pump houses & reservoirs. Tecnel can perform also the after sales services since we are KSB accredited service centre.

Tecnel is participating in medium EPC Contracts within substations, overhead lines < 33KV, hospitals and tertiary applications, PV power plants and Oil Storages.

Because of the LNG field perspectives at the Northern part of Mozambique, which is expected to start production by 2024, we are offering comprehensive instrumentation packages, variable speed drives installation & control systems/protections and bidding for e-houses/skids for temporary supply in Afungi – Cabo Delgado.

Our experience is very wide and ranges from HVAC to HVDC systems 533KV level applications, being the most experienced Mozambican Electrical Contractor above 400kV and used to work in brownfield or greenfield applications Tecnel can also offer Scada & HMI integration.

With operations in Mozambique since 1977, Tecnel is currently employing 95 workers, is committed with Country values, supporting knowledge transfer from experts to local communities and is engaged with high level of social responsibility.
